## MOBILE PHONES

Sun is shining behind the mountain  
Each staff is the source of fountain  
Reality is our mission.  
Victory is our study's reflection  
Endless hope is the only solution  
Racing against time is Ufuk's distinction  
God will help us in the examination  
Asking nonsense things is not a question  
Zealous style is our ambition  
If you want to succeed, Ufuk is the only direction

Unique teachers are our guidance  
Frustration is not the result of our performance  
Unifying with each other makes us full of perseverance  
Keep on studying with endurance

Collaboration raises us higher and higher  
Obeying the rules makes us tidier  
Laughing makes us happier  
Love all the people as if they are flower  
Elated parents whom you can encounter here  
Gift will be given by the Creator  
English will revive with us!!!

Ebru GÜNDEY - Özlem AYDIN / 11-D

The mobile phone has a nearly twenty-year-old past. The first commercial mobile phone, which had got huge dimensions was produced by Motorola firm in 1983 attracted all the attention. It weighed 2.5 kilograms and had been launched at four thousand dollars. Furthermore the first digital mobile phone was produced by Nokia firm in 1992. Infact, nowadays the phones give us opportunity to carry the world in our pocket. Day by day their size is becoming smaller and their features are expanding. Not only do they benefits, but also harm.

First of all the main advantage of phones is that you can use it whenever and wherever you are, and a person who is looking for you can find you easily. Secondly, the advantages of mobile phones are their portability. You can carry it in your pocket wherever you go. For instance, you can use internet to take it out from your pocket. In my opinion they are all

true. Many people are in favour of these advantages.

On the other hand there are a lot of disadvantages of a mobile phone. To start with it can be dangerous for our health, due to electromagnetic waves. The experts claim that the mobile phones' short-term damages are heart attack, memory weakness, the brain tumor risk, permanent hearing defeats and carelessness. Secondly the long term damages are high blood pressure and skin cancer. Furthermore, it is dangerous while driving. In other words talking to someone in the traffic may cause many accidents. I believe it is used when necessary, it is the most usefull invention.

To sum up, there are strong arguments both for and against the use of mobile phone. Despite the health problems, it seems that as long as the use of mobile phones is regulated, the benefits grow in number.

A life full of real friends, Sprinkle generously with kindness, Add  
plenty of faith and mix well. Spread over a period of a lifetime And serve  
each real friend you have **ENJOY YOUR CAKE! Good Appetite! Feyza KARAKAYA / 11 - B**

I'm on a long, narrow path  
I'm walking on, day and night.  
I've lost my sense of self.  
I'm walking on, day and night,  
Day and night, day and night,  
Day and night.  
Since the moment I came into this world,  
I was walking from the very beginning.  
In a caravansary with two doors.  
I'm walking on, day and night,  
Day and night, day and night,  
Day and night.  
In a caravansary with only two doors.  
I'm walking on, day and night,  
Day and night, day and night,  
Day and night.  
When contemplated deeply,  
It seems far away, when looked at.  
The road is but a minute long.  
I'm walking on, day and night,  
Day and night, day and night,  
Day and night.  
The road is but a minute long.  
I'm walking on, day and night,  
Day and night, day and night,  
Day and night.  
Veysel is confused in this state,  
(He) Sometimes cries, sometimes laughs,  
On the road to reach my destination.  
I'm walking on, day and night,  
Day and night, day and night,  
Day and night.

### You know it's time to reassess your relationship with your computer when...

1. You wake up at 4 O'clock in the morning to go to the bathroom and stop to check your email on the way back to bed.
2. You turn off your computer and get an awful empty feeling, as if you just pulled the plug on a loved one.
3. You decide to stay in college for an additional year or two, just for the free internet access.
4. You laugh at people with 28.8 modems.
5. You start using smileys :- ) in your snail mail.
6. You find yourself typing "com" after every period when using a word processor.com
7. You can't correspond with your mother because she doesn't have a computer.
8. Your email box shows "no new messages" and you feel really depressed.
9. You don't know the gender of your three closest friends because they have nondescript screen names and you never bothered to ask.
10. In real life conversations, you don't laugh, you just say "LOL, LOL!"  
L.O.L => (Laughing Out Loudly)
